

PA Core Mathematics Standards – Cluster Heading Matrix

Trifold – Grades 5-<u>6</u>-7

Domain	Grade 5	Grade 6	Grade 7
Counting and Cardinality			
Operations and Algebraic Thinking	 Write and interpret numerical expressions. Analyze patterns and relationships. 		
Number and Operations in Base Ten	 Understand the place value system. Perform operations with multi-digit whole numbers and with decimals to hundredths. 		
Number and Operations— Fractions	 Use equivalent fractions as a strategy to add and subtract fractions. Apply and extend previous understandings of multiplication and division to multiply and divide fractions. 		
Measurement and Data	 Convert like measurement units within a given measurement system. Represent and interpret data. Geometric measurement: understand concepts of volume and relate volume to multiplication and to addition. 		
Ratios and Proportional Relationships		Understand ratio concepts and use ratio reasoning to solve problems.	Analyze proportional relationships and use them to solve real-world and mathematical problems.
The Number System		 Apply and extend previous understandings of multiplication and division to divide fractions by fractions. Apply and extend previous understandings of numbers to the system of rational numbers. 	 Apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers.
Expressions and Equations		 Apply and extend previous understandings of arithmetic to algebraic expressions. Reason about and solve one-variable equations and inequalities. Represent and analyze quantitative relationships between dependent and independent variables. 	 Use properties of operations to generate equivalent expressions. Solve real-life and mathematical problems using numerical and algebraic expressions and equations.
Functions			
Geometry	 Graph points on the coordinate plane to solve real world and mathematical problems. Classify two-dimensional figures into categories based on their properties. 	Solve real-world and mathematical problems involving area, surface area, and volume.	 Draw, construct and describe geometrical figures and describe the relationships between them. Solve real-life and mathematical problems involving angle measure, area, surface area, and volume.
Statistics and Probability		 Develop understanding of statistical variability. Summarize and describe distribution. 	 Use random sampling to draw inferences about a population Draw informal comparative inferences about two populations. Investigate chance processes and develop, use, and evaluate probability models.
